DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/2/07 has been entered.

Amended claims 1-3, 5-6, 12-13, 15, 21 and new claims 22-30 are pending in the present application.

In light of the present claim amendment, the following species restriction is required.

Species Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

(a) SEQ ID NO:3; (b) SEQ ID NO:91; (c) SEQ ID NO:93; (d) SEQ ID NO:3 + SEQ ID NO:91; (e) SEQ ID NO:3 + SEQ ID NO:93; (f) SEQ ID NO:91 + SEQ ID NO:93; (g) SEQ ID NO:3 + SEQ ID NO:91 + SEQ ID NO:93.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply

must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Independent claims 1, 2, 13 and 21 are drawn to a recombinant expression vector consisting of in operable combination i) a nucleic acid sequence encoding Factor IX protein, ii) a human Factor IX promoter sequence, and iii) an age regulatory sequence consisting of one or more of SEQ ID NO:3, SEQ ID NO:91 and SEQ ID NO:93 wherein said regulatory sequence is located 3' of said nucleic acid sequence encoding Factor IX protein; an isolated mammalian host cell comprising the same recombinant expression vector and a method for expressing Factor IX protein in a cell using the same.

The following claim(s) are generic: 1-2, 13, 15, 21, 23, 28-30.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reason:

Each recited SEQ ID NO is different one from the others, as well as the various combinations of the differently recited SEQ ID NOs.; and each SEQ ID NO. is considered to be a special technical feature. Therefore they lack a common unity of invention.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
